# Product Discontinuation Notice

After extensive testing of various size power supplies with our +12 systems, MCS has decided to simplify ordering and supply by **eliminating the 50w & 75w power supply units and standardizing with the 100W version power supply.**

The 100w power supply unit meets the need of a single expansion board or can supply the power for a MCS-MAGNUM equipped with 15.4 touch screen and the maximum complement of MCS 12volt expansion boards.

*This decision is made solely for the purpose of inventory control and supply to our customers.*

The 50w & 75w products have performed perfectly and have given no reason to change any of these units that are currently in the field.

**All future shipments for the MCS+12volt systems will ship with the 100W power supply.**

The 50W and or 75W power supply can be special ordered if necessary but will no longer be an inventory item.

Please contact [sales@mcscontrols.com](mailto:sales@mcscontrols.com) for additional information.
