MCS-BMS-GATEWAY

MCS-BMS-GATEWAY is a peripheral device that provides a BACnet® MS/TP, LonWorks®, or Metasys® N2 communications interface to Building Automation Systems. A configured MCS-BMS-GATEWAY's protocol is field selectable.

MCS is now offering two models, the original MCS-BMS-GATEWAY with LonWork® support*, and the new MCS-BMS-GATWAY-NL, without LonWork®.

LonWorks® CONNECTOR
