SOFTWARE RELEASE NOTES

MCS-CONNECT
Version 18.14.06
7/12/2017

Updates from previous versions:
New Features:

1. Add Reheat Status column to Compressor Table for MicroMag V12 Devices.
2. Added a new ID to the Graphics screen to allow the user to view the Chilled Water ROC in the Graphics screen.
3. Added a Graph interval label to pre-Diagnostic save popup. Also, let user edit Interval from status screen with sufficient authorization from a Menu Item in the Setup.
4. Added code to enable Two Group Rotation in Circuit State Grid.
5. Added a Menu to the Alarm Frame to allow users to print up to the last 5, 10 or all of the lockout alarms at once and save them to a zip file in the diagnostic folder.

Bug Fixes:

1. The Offline Graph loader is blanking out the point names in the setup screen on the second file the user opens RESOLVED - Added a while loop to test that the grids have been initialized.
2. Removed the Authorization option from the Offline Autostart editor.
3. Cleaning up the code to increase the font sizes and optimize the UI for the 7" touch. This feature activated in the setup UI on the Tables tab.
