MCS Total Solutions for all your Control Needs

Water Cooled Chiller Upgrade Package(s)

Package with Touchscreen

Package with Industrial Control Panel

c UL us
UL 508

This brochure describes a standard upgrade package for the Turbocor series chillers. Each control upgrade installation is unique. It may be necessary to add additional options to the standard upgrade as described in this brochure.

Fill out the brief questionnaire in the back of this brochure and forward to your sales representative for an estimate.

Typical Upgrade

Package with Industrial Control Panel

Concerns:
- Old controls failed
- Wanted controls that were easier to understand and greater reliability, plus better and clear information

Equipment:
- Smardt and other brands Water Cooled Chillers
- One to Four Turbocor Compressors
- One to Four Staging Valves
- Load balancing EXV control
- Modulating condenser water valve

Steps Taken:
- Remove existing controls
- Install MCS controls
- Reprogram boards for communication
- Provide on-site training and support for contractor to better understand MCS controls.
Results:
One Smardt Chiller upgraded with MCS controls and one satisfied customer who is very happy with all the information and data available compared to the competitor's controls.

Old Controls

New MCS Touchscreen

New Controls

Part # MCS-MAGNUM-15.4-12

Description

The MCS-MAGNUM-15.4-12 consists of a MCS-MAGNUM controller along with a Touchscreen 15.4 in display.

The MCS-TOUCH-15.4 capacitive touchscreen interface designed to simplify user access with the MCS-Magnum and MicroMag utilizing MCS-Connect to provide both graphics and service mode access to technicians. Input method: Finger, Stylus or *Glove.

Highly accurate and does not require calibration – easy to clean glass surface. Works outdoors, bright screen, water resistant, Exceptional Optics – 1280x800 resolution, sharp and vibrant images.

MCS-TOUCH-15.4 comes preloaded with the MCS-CONNECT program that allows you to view the 'unit's status', 'extended history', 'alerts', 'alarms', setpoints, and more, all in a user-friendly graphic format. The MCS-TOUCH-15.4-12 can connect up to 60 MCS controllers and supports RS485 or Ethernet networking.

The MCS-MAGNUM-N is a durable microprocessor based controller designed for the hostile environments in the HVAC/R industry. It is designed to be the primary manager of the package it is controlling. The Magnum provides flexibility with setpoints and control options that can be selected prior to commissioning a system or when the unit is live and functioning. Displays, alarms and other interfaces are accomplished in a clear and simple language that informs the user as to the status of the controller.

The MCS-MAGNUM-N is a UL Recognized Component under UL File #169780 and also ROHS compliant.

Complementing the Magnum micro controller are a variety of MCS expansion boards.

Packaging

MCS-SHIELDWIRE-GROUNDING multi-terminal splicing connector with 9" - 18 awg wire with ring terminal (package of 2).

Ship Weight .... 8.73 lb (approx)
Box Dimensions .... 16" x 12.5" x 8" (approx)

Specifications

MCS-Magnum Controller

Dimensions	12.0"w, 8.0"h, 2.0"d
Mounting Holes	Mounts on a backplane utilizing 8 through-hole studs
Operating Temperature	-40°F to +158°F (-40°C to +70°C)
Operating Humidity	0-95% Non-Condensing
Storage Temperature	-40°F to +158°F (-40°C to +70°C)
Microprocessor	Zilog eZ80 Acclaim! @ 50mhz
Sensor Inputs (SI)	12 inputs 0-5vdc (10-bit A/D)
Digital Inputs	4 inputs 0 or 5vdc only
Relay Outputs (RO)	10 outputs 6.3amps @ 230vac
Analog Outputs (AO)	4 outputs 0-10vdc
Printed Circuit Board	Six layer with separate power and ground planes
Input Power (Standard)	+12vdc power in board from 95-265vac switching power supply 77°F (25°C) ambient, 20VA max
MCS-I/O Comm Port	1 @ 38,400 baud
RS-485 Comm Port	1 @ 19,200 baud
Ethernet	10/100 Mbps Ethernet
Real Time Clock	Battery backup
Power Detection	Automatic power fail reset

MCS-TOUCH-15.4 - Capacitive Touchscreen

Dimensions	17"L x 12.11"W x 2"H
LCD Screen	15.4" (16:10 Diagonal) 1280 x 800 Resolution Soft Touch Capacitive Stylus pen
Gasket	BISCO HT-820-Firm Cellular Silicone
Operating Temperature	-22°F to 176°F (-30°C to +80°C)
Operating Humidity	90 %RH (Non Condensing)
Storage Temperature	-22°F to 176°F (-30°C to +80°C)
Motherboard-Rev 4.0	Freescale i.MX6 Dual Core 800mhz 2Gb of 512mhz DDR3 RAM memory 16Gb of eMMC Flash memory 10m/100m/1G Ethernet 1 Micro-SD Slots 2 USB Host 2.0 Real Time Clock (RTC) w/ Battery 3 RS485 communication ports
Touchscreen Surface	UV Degradation Protection

Parts Included

- 90W 12VDC Power Supply
    Input Voltage: 88 VAC to 264 VAC
    Output Voltage: 12VDC @ 7.5Amps
    Input Current: 3A / 115 AC – 1.8A /230AC
    Output Rated Current: 7.5A
    Size: 2.76" x 3.54" x 2.14 (W"H"D) (70"90"54.5mm)

- 7ft CAT 5e Crossover Patch Cord, Orange

- Kit of (8) #6 x 1" Phillips Pan head Zinc Plated Steel Screws

* The glove needs to have a conductive fabric or material to work with cap touchscreens.

Revision - 2024-07-10

Part # **MCS-CENTRIFUGAL-12**

Description

The MCS-CENTRIFUGAL-12 Industrial Control Panel is made of powder coated aluminum for durability and longevity. A left hand swing door is mounted with three eight-inch hinges for strength. A key lock is provided for security on the door while still giving easy access of the display. This panel is intended for use in an environment protected from the weather.

The control panel consists of a MCS-MAGNUM-N-12, MCS-TOUCH 15.4" touchscreen, MCS-SI-BASE(2) with MCS-SI-EXT(1), MCS-RO-BASE(1) with MCS-RO-EXT(1) expansion boards.

12VDC and 24VDC power supplies included.

The MCS-TOUCH-15.4 capacitive touchscreen interface designed to simplify user access with the MCS-Magnum and MicroMag utilizing MCS-Connect to provide both graphics and service mode access to technicians. Input method: Finger, Stylus or *Glove.

Highly accurate and does not require calibration - easy to clean glass surface. Works outdoors, bright screen, water resistant, exceptional Optics - 1280x800 resolution, sharp and vibrant images.

The MCS-TOUCH-15.4-12 can connect up to 60 MCS controllers and supports RS485 or Ethernet networking.

Control panel includes the following; 20A, 16A and a 5A Single-Pole Circuit Breaker. A 5-port 10/100/1000 Mbps Ethernet Workgroup Switch Industrial rated, Red Alarm Indicator, Yellow Warning Indicator, Emergency Stop Switch with guard and 3 Position Run/Stop Selector Switch.

SHIELDWIRE-GROUNDING multi-terminal connectors are included to eliminate stray electrical current, thereby helping to reduce line noise form the sensors to the controller.

Packaging
Weight .... 90 lbs(approx)
Box .... 29" x 10" x 37"

Specifications

Certification............................ UL508A - E511647
NEMA Rating – Type 1 Control Panel
Enclosure is intended for indoor use primarily to provide a degree of protection against contact with the enclosed equipment and is not protected from liquids.

Industrial Control Panel
Dimensions of control panel .. 27"w x 39.75"h x 8.0"d
Mounting Holes..................... Mounts with four pre-drilled 15/32" holes
Rated Voltage (Standard)..... 120VAC or 230VAC
Phase / Frequency .... 1 Phase / 60Hz
Full Load Current(approx) .... 40A at 120VAC or 20A at 240VAC
Short Circuit Current Rating . 10kA

Temp. Range for Control Panel & Touch Screen
Operating Temperature......... -4°F to 158°F (-20°C to 70°C)
Operating Humidity............... 0-95% Non-Condensing
Storage Temperature............ -4°F to 158°F (-20°C to 70°C)

MCS-MAGNUM Specification
Microprocessor .... Zilog eZ80 Acclaim! @ 50mhz
Sensor Inputs (SI)................. 12 inputs 0-5vdc (10-bit A/D)
Digital Inputs........................ 4 inputs 0 or 5vdc only
Relay Outputs (RO).............. 10 outputs 6.3amps @ 230vac
Analog Outputs (AO) .... 4 outputs 0-10vdc
Printed Circuit Board .... Six layer with separate power and ground planes
Input Power (Standard).......... 12 vdc Regulated Power Supply
Minimum (Brown in) ....9.44 vdc
Amp Draw (Loaded) ....857.0 mA
RS-485 Comm Port .... 1 @ 19,200 baud
Ethernet................................ 10/100 Mbps Ethernet
Real Time Clock .... Battery backup
Power Detection .... Automatic power fail reset

MCS-SI-BASE/EXT Expansion Boards
Sensor Inputs (SI)................. 48 inputs 0-5vdc (2 Base/1Ext)
Analog Outputs (AO) .... 12 outputs 0-10vdc
MCS-I/O Comm Port .... 1 @ 38,400 baud

MCS-RO-BASE/EXT Expansion Boards
Relay Outputs (RO)...............20 outputs 6.3amps @ 230vac
MCS-I/O Comm Port .... 1 @ 38,400 baud

MCS-Touch-15.4 - Capacitive Touchscreen
Dimensions......................... 17"L x 12.11"W x 3.228"H
LCD Screen .... 15.4" (16:10 Diagonal)
16.2 Million Colors
1280x800 Resolution Touchscreen
Soft Touch Capacitive Stylus pen
Gasket.................................. BISCO HT-820-Firm Cellular Silicone
Touchscreen Surface............ UV Degradation Protection

Power Supply - Specification
12vdc power supply............85vac ~ 264vac
AC frequency range...........47 ~ 63Hz
Output rated current...........7.5A
Output rated power............90W

24vdc power supply............85vac ~ 264vac
AC frequency range...........47 ~ 63Hz
Output rated current...........4A
Output rated power............96W

Crossover Cable (orange) .....can be used for connecting
MCS Touchscreen direct to MCS-MAGNUM or to a Laptop

*The glove needs to have a conductive fabric or material to work with cap touchscreens.

Revision - 2024-03-26

MCS-MAGNUM/Touchscreen Graphics

MCS-MAGNUM-N-12

The **MCS-MAGNUM-N-12** is a durable microprocessor based controller designed for the hostile environments in the HVAC/R industry. It is designed to be the primary manager of the package it is controlling.

The Magnum provides flexibility with set points and control options that can be selected prior to commissioning a system or when the unit is live and functioning. The TouchScreen and MCS-CONNECT provide a clear and simple language that informs the user as to the status of the controller.
Touchscreen

he **MCS-TOUCH-15.4** capacitive touchscreen interface designed to simplify user access with the MCS-Magnum and MicroMag utilizing MCS-Connect to provide both graphics and service mode access to technicians. Input method: Finger, Stylus or *Glove.

Highly accurate and does not require calibration - easy to clean glass surface. Works outdoors, bright screen, water resistant, exceptional Optics - 1280x800 resolution, sharp and vibrant images.

MCS-TOUCH-15.4 comes preloaded with the MCS-CONNECT program that allows you to view the 'unit's status', 'extended history', 'alerts', 'alarms', setpoints, and more, all in a user-friendly graphic format. The **MCS-TOUCH-15.4**-12 can connect up to 60 MCS controllers and supports RS485 or Ethernet networking.

   Standard screens include:
   • System Overview Screen
   • Compressor Overview Screen
   • Evaporator/Condenser Overview Screen
   • Documents

SYSTEM OVERVIEW

COMPRESSOR OVERVIEW

EVAPORATOR CONDENSER
OVERVIEW SCREEN
OPTIONAL
'GRAPHS OVERVIEW SCREEN IN
REAL TIME'

* The glove needs to have a conductive fabric or material to work with cap touchscreens.

Typical Upgrade

MCS-SI-BASE

The **MCS-SI-BASE** provides a flexible and cost effective way to allow sensor input and analog output expansion for the **MCS MAGNUM**. Each MCS-SI-BASE has a stand-alone microprocessor which communicates with the MCS MAGNUM over the MCS-I/O port at 38,400 baud. All data is check summed with auto error correction. Because communication is over a RS-485 long distance two-wire differential network transmission system, the MCS-SI-BASE may be located up to 5,000 feet away.

MCS-SI-BASE board can be powered by a 12VDC regulated power supply and has a automatic power fail reset system.

MCS-SI-EXT mounted to
MCS-SI-BASE

MCS-SI-EXT

The **MCS-SI-EXT** provides a flexible and cost effective way to allow sensor input and analog output expansion for the **MCS MAGNUM**.

Each MCS-SI-EXT can be paired with a MCS-SI-BASE to double the number of inputs and outputs. Each MCS-SI-EXT board is powered by the MCS-SI-BASE board once it is stacked on top.

MCS-RO-BASE

The **MCS-RO-BASE** provides a flexible and cost effective way to allow relay output expansion for the **MCS-MAGNUM**. Each MCS-RO-BASE has a stand-alone microprocessor which communicates with a Magnum/Micromag over the MCS-I/O port at 38,400 baud. All data is check summed with auto error correction. Because the communication is over a RS-485 long distance two-wire differential network transmission system, the MCS-RO-BASE may be located up to 5,000 feet away. The MCS-RO-BASE board is powered by a 12VDC regulated power supply.

MCS-RO-EXT mounted to
MCS-RO-BASE

MCS-RO-EXT

The **MCS-RO-EXT** provides a flexible and cost effective way to allow relay output expansion for the **MCS MAGNUM**.

Each MCS-RO-EXT can be paired with a MCS-RO-BASE to double the number of outputs. MCS-RO-EXT board is powered by the MCS-RO-BASE board once it is stacked on top.

MCS-PRESSURE TRANSDUCERS

The **MCS Pressure Transducers** are one of the most economical and durable options on the market for dealing with high-pressure industrial applications.

In addition to being CE and UL approved, MCS transducers are capable of surviving high vibration. They include a cavity built out of solid 17-4 PH stainless steel ¼" SAE Female Flare fitting & Schrader valve; 7/16-20 UNF pipe thread which creates a leak-proof, all metal sealed system that makes the transducers ideal for use with rugged HVAC environments.

Typical Upgrade

MCS-T-100 Temp Sensor

An extremely fast acting temperature sensor built for demanding environments. It is ideal for high moisture locations with continuous freeze and thaw cycles. The sensor is potted with a thermally conductive RTV Cure Silicon Adhesive to guarantee durability and response. Its high accuracy allows for interchangeability in the field. The large resistance range allows the use of over 1000' of cable with no noticeable effect. The MCS-T100 sensor has the ability to move from 32ºF to 212ºF in approximately 10 to 15 seconds.

MCS-Wells/Tubes

The MCS-WELL was designed to be used with the MCS-T100 temperature sensor, although it has other applications. It is used in the 30HXC series chillers in the chilled water and condenser water lines. It comes pre-filled with heat conductive compound to aid in temperature to the sensor.

1/2 - 3"

1/4- 2.5"

The **MCS-TUBE** can be epoxied to a discharge or suction line on the 30HXC series chillers in order to obtain temperature readings without the use of a well. It was designed to be used with the MCS-T100 temperature sensor and comes pre-filled with heat conductive compound to aid in transferring temperature to the sensor.

MCS-EPOXY

- Pre measured resins and hardeners in one tube

- Easy to use - bonds, seals, plugs, molds and rebuilds

- No special tools needed

- Can even harden under water

- Pressure tested to .... 1300 psi
- Temperatures up to .... 500 degree F
- Color .... Gray
- Density .... 15.9 lb/gal (1.9 g/cc)
- Hardness (Shore D) 85
- Tensile Strength .... 6000 psi
- Compressive Strength .... 18.000 psi
- Modulus of Elasticity .... 6 x 105 psi
- Shear Strength .... 700 psi

Typical Upgrade

MCS-VOLTAGE-3PH

The **MCS-VOLTAGE-3PH** measures AC voltage between 200-600 AC. It is designed to monitor the voltage of each phase of the main input power to the unit. The MCS-VOLTAGE-3PH sensor provides three separate DC voltage outputs that correspond to the AC voltage it is measuring.

MCS-PHASE

The **MCS-PHASE** is a programmable 3-phase line voltage monitor with 25-fault memory, high temperature LCD display, easy setup and clear diagnostic readout of system faults. The MCS-PHASE was specifically designed to protect motors and other 3-phase loads from premature failure and damage due to common voltage faults such as unbalance, over/under voltage, phase loss, reversal, incorrect sequencing and rapid short cycling.

MCS-USB-RS485

The **MCS-USB-RS485** is a USB to RS485 cable that provides a fast simple way to connect a **MCS-MAGNUM** to a Laptop or PC.

The MCS-USB-RS485 cable contains a small internal electronic circuit board, which converts USB to RS485 with LED indicators for transmit (TX=Red) and receive (RX=Green).

MCS-EXV-DRIVER

The **MCS-EXV-DRIVER** is used for the positioning and control of Sporlan, Alco, Carel, and Danfoss bipolar expansion valves using an analog input of 0-10 VDC (0 VDC = 0% valve opening, 10 VDC = 100% valve opening). The MCS-EXV-DRIVER also supports overdriving on full opened and full closed voltage signals. The display decimal notifies when overdriving by blinking.

MCS-RS-485 EXTENDER

For those installations requiring an RS-485 port to be accessible without the necessity of opening the Control Cabinet door, MCS offers the part shown above.

The MCS-RS-485-EXTENDER mounting plate can mount on the outside of your enclosure and plugs into the RS-485 port on the back of the keypad.

A removable three-position terminal block is provided for easy wiring. to the keypad.

MCS-SEHI/SERI

The **MCS-SEHI/SERI** are Electronically Operated Step motor flow control valves, intended for the precise control of liquid refrigerant flow. Synchronized signals to the motor provide discrete angular movement, which translates into precise linear positioning of the valve piston. Valve pistons and ports are uniquely characterized, providing improved flow resolution and performance. The MCS-SEHI/SERI valves are easily interfaced with MCS microprocessor based controllers.

BMS GATEWAY

The **MCS-BMS-GATEWAY** is a microprocessor based communication device that provides translation from Bacnet IP, Bacnet MSTP, Modbus IP, Lontalk, or Johnson N2 communication interface. Information that can be transmitted includes the status of control points, alarm information, digital inputs, analog inputs or setpoints.

The MCS-BMS-GATEWAY protocol is field selectable by setting jumper on the device. Using **MCS-CONFIG** and the CONFIG files for the MCS-MAGNUM, you can automatically create the CSV files that is required by the MCS-BMS-GATEWAY.

2-3	SPARE2-3	Analog input not used
2-4	SPARE2-4	Analog input not used
3-1	Demand 3%	Compressor 2 Speed Demand
3-2	SPARE2-2	Analog input not used
3-3	SPARE2-3	Analog input not used
3-4	SPARE2-4	Analog input not used

Water Cooled Information

Company: _____   Phone: _____

Name: _____ Title: _____ Email: _____

Mobile:_____ Jobsite: _____

Chiller Manufacturer	Chiller Model Number	Chiller Serial Number	Refrigerant Type

How are the new controls from MCS provided: *In MCS Control Enclosure*   *Field mount new boards in existing cabinet*

How many Circuits? _____   How many compressors per circuit?_____

1. *Compressor Model(s):   Comp #1: _____   Comp #2: _____   Comp #3_____   Comp#4: _____*

2. *What is the compressor's Full Load Amps (FLA)? Comp #1:_____ Comp #2: _____ Comp #3: _____ Comp # 4:_____*

3. *Does / Will unit have a refrigerant Level Sensor   Yes   No   If no, MCS will control on Suction Superheat.*

   If yes, is the Level Sensor located on: Evaporator   Condenser

   Level Sensor Model:_____   Signal Output?_____

4. *What model EXVS will you be using for: refrigerant level/superheat control?_____   How many EXVS?_____*

5. *Does / Will you be using a staging valve for each compressor?   Yes   No*
   (comes off the discharge of compressor BEFORE the check valve and goes back to suction side of compressor. Each compressor will have its own valve)

   If yes, what model valves? Comp #1: _____   Comp #2: _____   Comp #3:_____   Comp #4: _____

6. *Does / Will you be using a (LBV) load balancing valve (aka hot gas valve) on the unit?   Yes   No*

   (comes off the discharge of compressor **AFTER** the check valve) *If yes, what model valve? _____*

7. *Will MCS control the Condenser?   Yes   No   Condenser type? _____*

   Will the Condenser Water Pump be wired or will a Condenser Isolation Valve be used? _____

   If Air Cooled, Common Condenser?   Yes   No

   If yes, how many fans? _____ If no, how many fans per circuit?_____   VFD on first fan, per circuit?   Yes   No

8. *Will MCS control the Evaporator?   Yes   No   If yes, 1 or 2 pumps? _____   VFD's?   Yes   No*

9. *Is there an Economizer on this chiller?   Yes   No   Type of Economizer? _____*

   If 'None', what type of econo control used to the compressor?_____
   (EXV modulated based on econo superheat(requires econo suct psi & Temp)

10. *Will the unit be communicating to BMS?   Yes   No   What Protocol will be used to BMS? _____*

COMMENTS (is there any other information we should know?):
