

Directions:

1. Remove the plastic nut from the MAGNUM-N board where the MCS-COMPACT is meant to be placed.
2. Insert the MCS-COMPACT into the aforementioned area. Make sure all three ports are fully connected to the MAGNUM-N board.
3. Slide the FLASH-2G into the port of the MCS-COMPACT.
4. Once your data has been collected, remove the FLASH-2G from the MCS-COMPACT and insert it into the Compact Flash Card Reader.
5. Plug the Card Reader into the USB port of the computer, thereby connecting the FLASH-2G to the computer.
