

# The Control Zone

Total Solution for all your Control Needs

Volume Six - Issue 1

March/April 2020

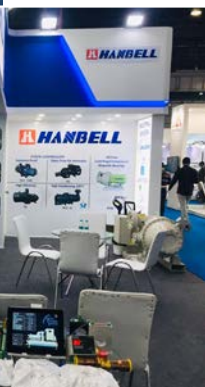

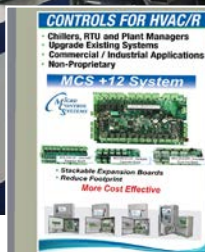

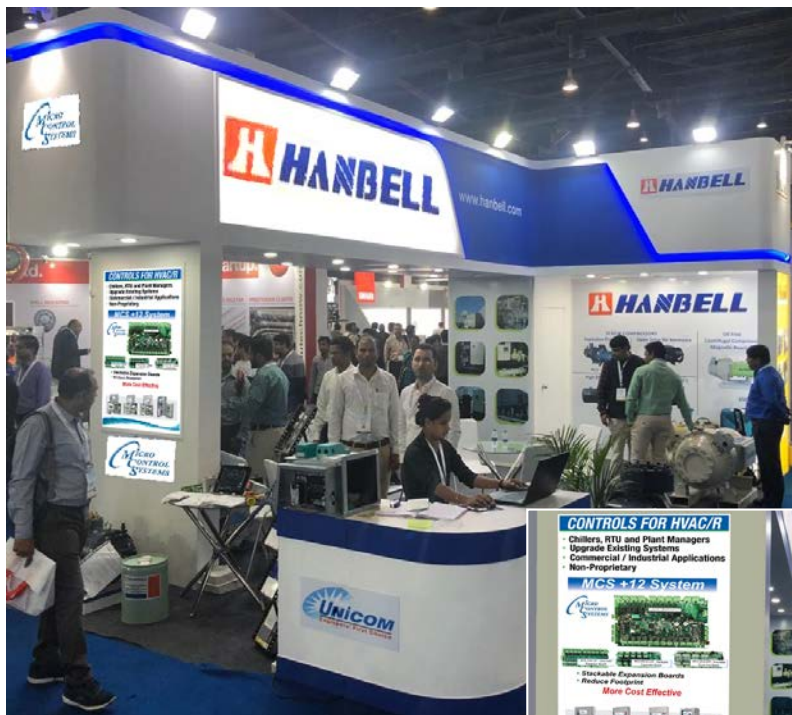

## From the Desk of the President:

We officially launched our new website. It has been a long time coming, but we used our own engineers to develop it in their 'spare time'. We built this new site completely in-house to allow us to make changes quickly when needed. Please take a few minutes from your valuable time to peruse through all the pages. Let us know if you are unable to find what you're looking for, and give our website engineers a shout out about the great job they have done with this project.

## MICRO CONTROL SYSTEMS at Acrex India Show - Unicom Booth February 27 to 29, 2020 India Expo Centre, Greater Norda, India

Unicom, an OEM supplier for MICRO CONTROL SYSTEMS, displayed MCS products at the recent Acrex Trade show held in Greater Norda, India in February, 2020. ACREX India covered the HVAC, Refrigeration, and Building Automation Systems and much more. Mr. Anand Kekre of Unicom said the MCS products were well received at the show.

## MCS has officially launched our new Website

The website was built entirely in-house by our own engineers. Flint Humphrey, Chris Haddock, Ray Jaramillo and Mike Schreiber worked in their spare time developing reflexive layouts which fit all mobile devices, something we did not have with our old website. Be sure to spend some time viewing the new website.

### *Providing your workers with the right tools to make their work easier*

In today's working environment it's important to monitor what your employees are achieving and if they are safe in their work space.

This is something as simple as building a table so employees can slide a heavy item onto their work station instead of lifting it. This shows them you have their well being in mind.

An operation can be simplified so a task becomes easier and more productive. MCS found ways to help improve its production while cleaning up the work area for employees.

Preparing an Enclosure Build Kit ahead of time helped streamline the production and assembly for our standard control enclosures. With our pre-built enclosures, we can now ship in a week or less.

**MCS Energy Efficient  
and RoHS Compliant**

## New at MCS

*Introducing . . .*

## Chiller Kits

Single Compressor - 108, 160, 209 TONS  
Dual Compressor - 102, 165, 217 TONS  
Based on R134A Refrigerant

Flooded Chiller, Water Cooled  
High Efficiency with VFD

Includes a Control Enclosure, Hanbell RE Compressor running the newer refrigerants, plus all the tools you need to run an efficient chiller for your plant or office. Contact MCS sales for more information.

## MCS Family

***Our employees are one of the  
greatest assets we have.***

**Years at MCS: 9**

**Flint Humphrey**

Flint writes source code and tests new and old firmware for our micro-controllers, new and old software to configure our micro-controllers, and website server configuration in our Engineering Research & Development department. He also provides networking and email support for our communication devices and administration.

Flint is a family man with 6 children at home ranging from 7 to 20 so when he is not here at MCS performing his important work duties he is enjoying being a father and caregiver to his family at home.
