

Software Release Notes

MCS-CONNECT
Version 18.09.02
04/17

MCS-CONNECT is constantly being updated to enhance the quality of the software and add new features.

Stay current with your software to take advantage of the new features being added.

You can update your software at the following link: <http://www.mcscontrols.com/software.html>

Below are some key features that have been updated and added to MCS-CONNECT recently.

ALARM ALERTS

Allows a technician to setup the information in MCS-CONNECT to email and or text alarm information for the controller direct to technician or customer.

LIVE GRAPHS

'Live Graph' allows the user to view a graph in '**Real Time**' while connected to the controller. The system will grab data from the controller you are connected to and display it in graph format.

EXTENDED HISTORY SAVE

Extended History Save can be setup in MCS-CONNECT Specify a location on your computer or laptop to save for for viewing later. Use a USB drive to save the files on a MCS-TOUCHSCREEN for viewing or printing.

GRAPHICAL INTERFACE

The graphical interface with custom graphics which is built into MCS-CONNECT allows the technician to better view the controller.

Based on the features listed above, we strongly recommend upgrading your software.
