

# SOFTWARE RELEASE NOTES

---

MCS-CONNECT  
Version 9.02S  
05/29/2012

## Updates from previous versions:

### Bug Fixes:

1. On Windows 7 machines, new ExceptionLogginUtility class is causing user to have to run MCS-Connect as Administrator. Temporarily removing Class initialization without destroying class.
2. Removing test when transmitting config to ensure that both config version and software version are compatible due to malfunction in checking the software version number with new function "setSoftwareVersionDigits()".
3. In the Information UI, I swapped the config name label and the time/date label from the top information bar, to ensure that the time is in the center and always able to be seen.
