

SOFTWARE RELEASE NOTES

MCS-CONNECT
Version 18.01.00
06/29/2016

Updates from previous versions:

New Features:

1. Added new columns in the EXV grid. These are only displayed if the EXVs are Fast SSH
2. Added a new function to the exception popup class to replace a multiple function call everywhere reducing code base size.

Bug Fixes:

1. Due to a rounding error some values that a user tried to enter into a Manual sensor were off by .1 depending on the # of decimals. RESOLUTION - I changed the code to use a Big Decimal type to move the decimal point.
2. Optimized some code in the RO Manual Status Editors. Removed the use of temporary structures.
