MCS-CONNECT
Version 18.12.15
6/20/2017

Updates from previous versions:

New Features:

1. Added the option to select .html files to the file chooser in the Graphics tab of the service Frame
2. Added new options for the specials drop down for the Modbus configs.
3. Added a Panel to the Service UI for MicroMag to display the Graphics Path that is stored in the config.
4. Added HCRF firmware to the device checks in Info UI. This will allow HCRF devices to communicate.
5. Added the calculated MAC address of the unit to the Service Window in the Ethernet tab.

Bug Fixes:

1. The network interface list was not allowing the user to select an interface from the ALL list. FIXED
2. When resetting the "Last off" column in the SI grid the value was being incorrectly set to -999 instead of 9999. FIXED
3. The setpoint value editor is cutting off the cancel ok buttons when trying to change a value without getting authorized first. FIXED
4. An exception was being thrown if opening an incomplete offline graph. FIXED
5. Set the minimum message size to 512 and the max message size to 1024 in the Communication setup.
6. The multi-board button in offline graph is not displaying the functionality popup correctly - RESOLUTION - Added correct popup.
7. Testing for Fast SSH to display the ADJ Delay column value using the Setpoint for Fast sub cool.
8. Prior change caused an issue with the Setpoint value editor. The same setpoint is represented every time the user tries to make a change to a setpoint after the first. FIXED
9. When doing a diagnostic save the graph setup is modal and is blocking the save from finishing after change. RESOLUTION - Removed the call to make that UI modal.
