

SOFTWARE RELEASE NOTES

MCS-CONNECT
Version 9.04B
11/26/2012

Updates from previous versions:

New Features:

1. PreCooling table added to Micro-Mag Status grid if MicroMag has this option enabled.
2. Added a new state (CLEAN) to RTU Heat Wheel in Magnum V11 and changed the headings of "Heat Wheel" to "Energy Recovery Wheel" to match Magnum LCD.

Bug Fixes:

1. Offline graph files are not loading due to a change in the way the SI grid is initialized in the last release. The SI names were only being initialized if MCS-Connect were connected to a Magnum online. The lack of names is causing an exception which was not being caught. RESOLUTION - Moved the check for an online Magnum to later in the SI load to allow the SI grid to initialize the SI names regardless on current connection status. This change allows the offline graph to finish setting itself up.
