MCS Release Note

Product Type: MCS-Connect Software Revision: 19.01.08
Release Date: October 2, 2025

_____

Release 19.01.08 - Thursday, October 2, 2025 Log:

Summary:

- This release improves stability, runtime predictability, and operator efficiency. Authentication and UI behaviors are hardened, PMGR startup and mode visibility are more deterministic, and refrigerant data is expanded for clearer diagnostics.

Bug Fixes:

- Fixes authentication and UI issues
- Corrects Bacnet address range label updates in the service window when the Limit Range checkbox is toggled to ensure UI-state accuracy.

Features:

- Updates PMGR mode display and functionality
- Introduces color-coded modes (Cooling, Heating, Heat Recovery, Changing) in CapControlTable, initializes PMGR device RAM on startup for deterministic behavior, updates unit status based on protocol type for coherent state reporting, and increments main UI version for compatibility.

Additions:

- Added R245FA to P/T chart
- Added R515B to P/T chart
