

MCS-POCKET ROUTER

Description & Specifications

Part # **MCS-POCKET-ROUTER**

Description

The **MCS-POCKET ROUTER** is the perfect travel companion for anyone who needs fast, easy wireless internet access on the go. Designed with a portable form factor that easily fits into a pocket, a laptop case, or the palm of your hand.

The MCS-POCKET ROUTER, 2.4GHz wireless technology allows 11n data transfer rates of up to 150Mbps while still remaining compatible with older 11b/g devices.

The MCS-POCKET ROUTER can be USB-powered to ensure convenient internet access anywhere.

Easy Setup

MCS-POCKET ROUTER ships with a different default SSID and encryption enabled by default. Check the bottom of the Pocket Router-2 for the security key used by your router, or change it to one of your own choosing.

Advanced Security Features

To provide the highest data security possible, the MCS-POCKET ROUTER supports WEP, WPA, and WPA2 encryption. It also comes equipped with firewall features like NAT (Network Address Translation), VPN pass-through, and SPI (Stateful Packet Inspection) to prevent attacks from the internet.

Specifications

Standard.....	IEEE802.3, IEEE 802.3u, IEEE802.11n auto rate up to 150Mbps IEEE802.11b/g compatible auto rate up to 54Mbps IEEE802.1x MDI/MDI-X adaptive flow-control IEEE802.1p IEEE802.3x IEEE802.3az
Operating Modes.....	Router, Access Point WiFi Client Bridge
Wireless Security.....	WEP, WPA-PSK, WPA2-PSK
Security.....	64/128-bit WPA/WPA2 SPI Firewall, WPS Setup
Routing & IP Management	Static IP, DHCP, PPPoE NAT

Hardware Specifications:

Ports	2x 10/100Mbps (1x WAN, 1x LAN) 1x MiniUSB (For Power)
Power	5V DC USB
Operating Temperature.....	0C-40C
Storage Temperature.....	-20C-70C
Operating Humidity.....	10-90%RH, non-condensing
Storage Humidity	5-90%RH, non-condensing
Dimensions.....	2.93" x 2.33" x .62"

Kit Components

- 110# power cord
- USB cable to MCS-POCKET ROUTER
