

MCS-WIRELESS-MODEM

Description & Specifications

Part # **MCS-WIRELESS-MODEM**

Specifications

- Model Name: Wireless: 4G/LTE Modem
- Connections/Ports: 2 Ethernet LAN/WAN ports (10/100), One USB Modem
- Buttons/Switches: Power On/Off Switch, Reset, Signal Strength
- Led Indicators: Power, Modem Signal Strength LEDs
- Power: DC input 9-18 VDC 100-240V AC
- Dimensions: 3.3in x 4in x 0.9in (85mm x 102mm x 22mm)
- Weight: 7.2 oz. (200g)
- Operating Temperature: 0°C to 40°C (32°F to 104°F)
- Operating Humidity: 5% - 95%
- Warranty: 1-Year Limited

Package contains the parts shown below:

Dual Band - 800-1900 MHz Mini Magnet Mount Antenna with SMA Male Connector and 12.5-Foot RG174 Coax

Ethernet Cross Over Cable supplied

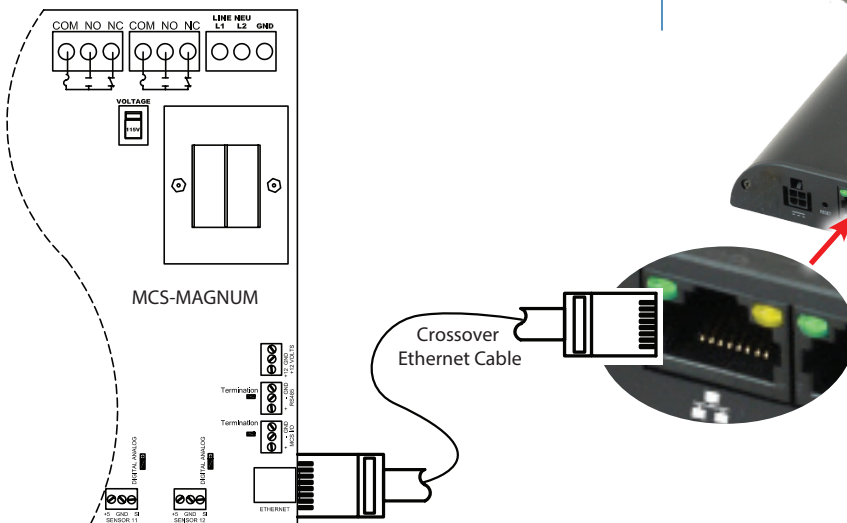

Description

The **MCS-WIRELESS-MODEM** is a powerful tool that is especially useful in locations where there is no readily available internet connection. The MCS-WIRELESS-MODEM provides instant network connectivity with a modem. Using MCS WIRELESS-MODEM data plan with 250mb per month, you are instantly connected at the job site.

The MCS-WIRELESS-MODEM is ideal as a primary connection solution where wired internet is not available(2G,3G,4G). It also supports traditional wired data networks (WAN) like DSL or Cable Internet Service Provider for maximum network flexibility.

The MCS WIRELESS-MODEM should be used in critical installations where access is limited and monitoring is desirable.

Good service tool, remote monitoring and troubleshooting!

Carrying Case Included
