

# MCS-667-XP Description & Specifications

#### **All Stainless Steel Construction**

- Wide Operating Temperature
- Low Static and Thermal Errors
- Rugged Design Withstands Harsh Environments
- Suitable for High Shock
  and Vibration

Part # MCS-667-XP

## **Description**

The **MCS-667-XP Explosion Proof** pressure transducer is an economic and durable option for dealing with high-pressure industrial applications where an explosion proof transducer is required.

The high strength one-piece stainless steel construction contains no silicone oil, no welds, and no internal "O" rings, offers a full hermetic seal against corrosive media.

In addition to being CE and UL approved, the MCS-667-XP is capable of surviving high vibration. It includes a cavity built out of solid 316L stainless steel with1/4" SAE Female Flare fitting; 7/16-20 UNF pipe thread which creates a leak-proof, all metal sealed system that makes the MCS-667-XP ideal for use with rugged HVAC environments.

MCS-667-XP has an output voltage of 0.5 to 4.5vdc (ratio metric) and is also overvoltage-protected in both positive and reverse polarity, which adds an extra layer of safeguard against short-circuiting caused by unpredictable power surges.

### <u>Option</u>

-H ..... Explosion proof Housing

#### **Certification**

Approved to CSA 30 (UL 1203) Class 1, Div. 1, Explosion proof, Groups A,B,C and D.
