Product Update

## New Magnum Revision 6.1

*Providing HVAC/R Control Solutions Worldwide*

Micro Control Systems has introduced a new improved version of the MCS-MAGNUM-N board. In order to provide greater flexibility in relay output wiring and to hold down the rising cost of parts, we have changed all the removable connectors on the board to a newer euro style connector.

In addition, as shown below, there are now separate removable connector blocks for each of the ten relay outputs on the board, each providing a separate COM, NO and NC from its corresponding relay.

When using this new board to replace an older Magnum in the field, please remember that the wiring to the connectors will need to change. All other aspects of the board remain the same.
