## 5mm Connector Block Change

*Providing HVAC/R Control Solutions Worldwide*

Micro Control Systems is in the process of standardizing the type of 5mm connector blocks used across our product line. Shown below are photos of our older 3, 4 and 6-position black RIA connectors. Behind them are the newer green Euro-style Tyco connectors which will be replacing them.

Typically you would see these connectors used for sensor inputs, analog outputs, RS-485 and MCS-I/O communications. These are *not* the 7mm connectors used for our relay outputs. Our MAGNUM micro-controller boards moved over to the 5mm Tyco connectors in 2008 beginning with Revision 6.0.

The only MCS products that will not change over to the 5mm Tyco connectors are the MCS-8 and MCS-I/O product lines.
