

SOFTWARE RELEASE NOTES

MCS-CONFIG Version 17.00C 10/29/2014

Updates from previous versions:

New Features:

1. In CPM config types V17 on the MAG CPM screen under the Chiller Info section adding a second Chillers grid that will hold all of the points for the Hardwired Chillers. 1.) Remote Run/Stop RO, 2.) Remote Emergency Stop RO, 3.) Remote Chill Water Reset AO, 4.) Remote Demand Limit AO, 5.) Remote Demand Steps AO, 6.) Remote Lockout Reset RO, 7.) Remote Alarm SI, 8.) Remote Stages Available SI, 9.) Remote Actual Stages On SI.

Bug Fixes:

1. In CPM config types V17 when the cfg file is saved and the checksum is calculated there was a irregular error being caused by an internal VB function that calculates the checksums. Resolution: Instead of calculating and adding all of the CPM circuit structures together, split them up, assigned their calculated values individually and then summed up those variable values to assign to the checksum memory location.
