

SOFTWARE RELEASE NOTES

MCS-CONFIG Version 17.00M 02/06/2015

Updates from previous versions:

Bug Fixes:

1. In ALL config types V11, V14, and V17 on the SI Info grid under the Manual Value column when the Display Type column is a User Logic with a Digital/SW secondary display type then the Manual Value column is not saving correctly when changing from Open-OFF to Closed-OFF. Once the file is saved and reopened the values are set back to Open-OFF. Resolution: The values were not being saved to the separate union structure of the User Logic.
2. In ALL MicroMag config types on the Circuit Base screen the recently added AO Start Time(SEC) column and it's set to a time range field and should be set to an AO drop down list called EXV AO. Resolution: Remove and add the source code needed to make this change. Change the headings in the grid properties.
