

SOFTWARE RELEASE NOTES

MCS-CONFIG Version 18.00C 03/23/2016

Updates from previous versions:

Bug Fixes:

1. In ALL Magnum cfg types V11, V14, V17 on the SI Info screen: If the Display Type column is MODBUS, the Modbus Display Type popup is frozen in a loop when any of the values entered are NULL or blank and OK is clicked. Resolution: Add a test for NULL or blank and set value to 0.
2. In CENT cfg types V17 on the SI Info screen under the Display Type column when the type selected is VirtualVane% the Multiplier, Divisor, and Offset columns are not editable. Resolution: Add the display type to the test for those three columns in the update method of the SI grid.
