

SOFTWARE RELEASE NOTES

MCS-CONFIG **Version 18.00F** **6/3/2016**

Updates from previous versions:

New Features:

1. In ALL config types V17 on the AUTH, SETPOINTS, and SETUP screens adding in a new Auth Level called Site Manager that will be saved as a 33. All of the Auth Level drop down boxes will be updated with this new level. On the SETUP screen adding a new label and drop down called Display Alarms.

Bug Fixes:

1. In ALL MICROMAG config types V18 on the Setup screen the Type of I/O boards radio buttons are working incorrectly for the amount of points allowable. Resolution: Correct the test that is checking for the board types and correct the label text to show the correct I/O board selections. Also, setting the Thermostat address to a static value of 1 and graying out the text field for the Thermostat address to show the user the value.
