

SOFTWARE RELEASE NOTES

MCS-CONFIG Version 18.00H 8/1/2016

Updates from previous versions:

New Features:

1. In ALL of MCS-CONFIG config types V17 adding in the smart save function which will compare what is in RAM to what is in ROM and if different the User will be prompted to Save or Close without saving. The Save As dialog will appear so the user can save the file before closing. ****INCOMPLETE****

Bug Fixes:

1. In ALL MICROMAG config types V18 the print report is not working correctly. Resolution: Add the V18 cfg version test to the print function.
2. In ALL HVAC, CENT, RTU config types V14 conversion to V17 on the MAG screen under the Evaporator section on the Pump/Fan panel some of the fields are defaulting to 0 instead of 255. Resolution: Add the memory locations to the convert function and assign them a value of 255.
