

SOFTWARE RELEASE NOTES

MCS-CONFIG Version 18.00W 04/28/2017

Updates from previous versions:

Bug Fixes:

1. In ALL config types that support the circuit base screen on the condenser grid when Fast SH, Fast EvpLvl, or Fast DSH is activated for the Evap EXV Control the values that are entered into the Setpoint grid for setpoints 9-20 are static and cannot be changed unless the user is Admin authorized. Resolution: Set the setpoints values for 9-20 to whatever is saved to the file instead of setting them back to default values.
2. In ALL config types V10, V11, V12, V14, V16, V17, and V18 when a cfg file is opened via right click or double click the focus is set to the SaveAs button of MCS-Config instead of the Auth popup. Resolution: On the Form activate event of all auth popups adding source code to set the focus to the auth popup text box.
