

SOFTWARE RELEASE NOTES

MCS-CONFIG **Version 18.01J** **12/14/2018**

Updates from previous versions:

New Features:

1. In ALL config types V17 on the EXV Control tab Control Method panel adding the PID option that was added to the Circuit Base screen. If PID is set then only SSH, DSH, and Approach will be available as a Control Parameter.
2. In ALL config types V17 except LWC and CPM on the RO, SI, and AO User Logic Display Type when the Operand selected is a Circuit # 1-20 adding an option to the end of the Index list called EXV PID Ttl Adj and will be saved as #39.
3. In CENT config types V17 on the Circuit Base screen on the first grid adding a column called Economizer(Subcooler) RO with a relay drop down list.

Bug Fixes:

1. In ALL cfg types V17 on the EXV Control screen made minor adjustments to SSH values and changed a few captions and the way the screen is displayed. All functionality stayed the same.
