

SOFTWARE RELEASE NOTES

MCS-CONFIG Version 18.01R 11/15/2019

Updates from previous versions:

Bug Fixes:

1. In ALL config types V17 BMS Points screen when the CREATE CSV FILES button is clicked and BACnet csv file is created on the Server side of the file the Node_Name columns under Server Side Nodes and all Map Descriptors will now contain the Name field text that is saved in the MCS-Config file instead of MCS_BMS_Gateway.
2. In RTU config types V17 MAG RTU screen Heating Info section on the Primary and Auxiliary panels when a different Heat Type is selected fields that are hidden are not being set to Not Used. Resolution: Add tests for every Heat Type button box to change memory location and text to Not Used when any overlayed box is hidden and when back to visible display Not Used.
