

SOFTWARE RELEASE NOTES

MCS-CONFIG **Version 18.01V** **05/01/2020**

Updates from previous versions:

New Features:

1. In RTU config types V17 MAG RTU screen under the Heating Info section on the Heat Pump panel adding 2 new panels called Low Suction PSI Offset and Advanced Cond Control. Low Suction PSI Offset will set the Value, Min, and Max columns on the Setpoint Info screen for setpoint #157. The Advanced Cond Control will be a YES/NO option, if YES then setpoint #50 will be set to a Target type and then a panel called Condenser Target Offset will be displayed with Low Zone, High Zone, and Setback text boxes for the user to enter values that will populate those columns with the values on the Setpoint Info screen for setpoint #50. If NO then setpoint #50 will be set to a Setpoint type and the Condenser Target Offset panel will be hidden.

Bug Fixes:

1. In RTU config types V17 MAG RTU screen under the Heating Info section changing the heading of Common Rev. Valve to Unit Rev. Valve. If the Unit Rev. Valve is set to Not Used then show 1 Reversing Valve Per Suction Group panel otherwise hide the panel.
