

# MCS Release Note

**Product Type: MCS-Config Software Revision: 19.01.39**

**Release Date: April 10, 2026**

---

## **Release 19.01.39 - Friday, April 10, 2026 Log:**

### **Overall Summary:**

- This release includes important stability and usability improvements focused on IO point printing and LonTalk communication. These updates improve accuracy when working with larger system configurations and ensure more reliable read/write communication with connected building management systems.

### **Bug Fixes:**

- Resolved an issue where certain IO points were not appearing correctly in printed outputs on larger system configurations.
- Improved support for expanded IO board setups to ensure all configured points are now included and displayed properly.
- Fixed issues that could cause missing data or incorrect point alignment in LonTalk configuration exports.
- Improved communication handling for writable BMS points so values can now be read and updated more reliably.
- Added safeguards to improve stability when working with smaller or varying configuration sizes.

### **Patches:**

- Improved IO print output accuracy for larger systems
- Enhanced LonTalk configuration reliability
- Increased overall stability for varying configuration sizes
