

SOFTWARE RELEASE NOTES

MCS-CONFIG Version 8.00L 03/22/2011

Updates from previous versions:

New Features:

1. Support for refrigerant type R-417A has been added to MCS-Config. Refrigerant types are selected in the Evaporator Info panel of the MAG V8 screen. Requires HVAC or CENT software version 8.05-D or newer.

The screenshot displays the 'Magnum HVAC V8 Information Screen' with the 'Evaporator Information' panel selected. The 'Refrigerant Type' dropdown menu is open, showing a list of refrigerant types: R508B, R422B, R438A, R113, R407A, and R417A. The 'R417A' option is highlighted. Other panels visible include 'Capacity Control', 'Pump/Fan', 'Process Control', and 'Economizer Control'.

2. One new sensor type has been added to MCS-Config (requires HVAC or CENT software version 8.05-B or newer):
 - a. MODBUS – Same as User Defined but renamed for use with Modbus devices.
3. Two new display types have been added for User Logic and User Defined sensors (requires HVAC or CENT software version 8.05-B or newer):
 - a. DEC1NOCH – Display sensor value with 1 decimal place and no characters.
 - b. DEC2NOCH – Display sensor value with 2 decimal places and no characters.
