

SOFTWARE RELEASE NOTES

MCS-CONFIG Version 8.00W 07/05/2011

Updates from previous versions:

New Features:

1. Added informational display on mouse hover feature. When the cursor hovers over a column in the Circuit Base screen, a tool tip will be shown for the associated setpoints (if any).

Bug Fixes:

1. Fixed printing bug. When the user prints any info from MCS-Config they may select which printer they want to print to. If the user tries to print again and change to a different printer, MCS-Config did not allow the change.
2. Changed 'EXV On Adj' and 'EXV Off Adj' columns on the RO screen to read 'EXV Load Adj' and 'EXV Unload Adj' respectively.
