

SOFTWARE RELEASE NOTES

MCS-CONFIG Version 9.01 10/25/2011

Updates from previous versions:

New Features:

1. Added a new authorization level, "Admin Level," to config. The new level will be the same as logging in under "Factory Level"
2. Added new feature for the user to select whether the Cut In/Out setpoints will be based on fixed values or individual offsets (both options will use setpoints #3-18). When the user selects Cut In/Out as the control method in the Evaporator information panel in the MAG V8 tab then a popup window will appear prompting the user to select one of these methods.
3. Added new refrigerant type R423A to all software.
