

# SOFTWARE RELEASE NOTES

---

MCS-CONNECT  
Version 15.00F  
08/19/2014

## Updates from previous versions:

### New Features:

1. In the Service Panel's Ethernet Tab added code to display the currently used IP Address, default Gateway and Subnet Mask even when using Dynamic IP. The text boxes are still disabled when Dynamic is selected. On Firmware 16.00 and earlier only the IP is displayed, the gateway and subnet are still zeros.
2. New Refrigerant Type R290.

### Bug Fixes:

1. The Level Target column in the EXV grid for V14 SW was not updating if the setpoint grid was iconified or that particular setpoint was not currently shown in the grid. RESOLUTION - Added a check in the refresh loop to refresh that set-point value if appropriate.
