

SOFTWARE RELEASE NOTES

MCS-CONNECT
Version 14.01F
01/24/2014

Updates from previous versions:

New Features:

1. Started coding new XML Graphic package - NOT RELEASED INTO PRODUCTION DUE TO NO XML FILES BEING POINTED TO IN CFGS.

Bug Fixes:

1. In device types prior to Mag V11 an earlier change is preventing change popups from displaying when double clicking on the name column of the RO, AO and SI grid. RESOLUTION - Added a test to make specific columns editable based of device type.
2. In the Duct Static Target column in the evap fan grid for RTU type configs the value is not updating unless the setpoint grid is open. RESOLUTION - Forcing that field to always refresh if cfg type is RTU.
3. In user logic ROs the Fixed value operands were still displaying incorrectly. RESOLUTION - Edited the put function to use the original array passed in instead of the transformed short array.
