SOFTWARE RELEASE NOTES

MCS-CONNECT
Version 17.00E
11/12/2014

Updates from previous versions:

New Features:

1. **MicroMag SI Grid types are only displaying 1 set of values for digital SIs (ON/OFF) due to using a non-updating field as the index for the headings array. RESOLUTION - In MicroMag I changed the field that indexes into the si digital value header array.**
2. **Added support for Headers in XML graphics to be more user designed.**
3. **Small adjustments to validate code used to receive/transmit modbus configurations.**

Bug Fixes:

1. **Changed the Message Retry/Cancel popup due to inconsistencies.**
