SOFTWARE RELEASE NOTES

MCS-CONNECT
Version 17.00N
02/05/2015

Updates from previous versions:
New Features:
1. Added EXV Target(Adjusted) column to EXV grid for Firmware 17.13 and later.
2. Adding EXV Tables to MicroMag

Bug Fixes:

1. The call to open the Native Interface in the Magnum PC Connect class is causing a socket error in linux touchscreens. RESOLUTION - Added a conditional to only make the call on non-linux based machines.
2. Moved some initialization of the Communication setup UI tabs out of the constructor and into stand-alone methods that will be called after the UI is made visible. This should reduce initialization time thereby displaying the UI quicker.
3. When deleting a site from the site combo box MCS-Connect is not fully deleting it and then displays a blank site box. This was caused by an action listener firing instead of an item listener causing an exception. RESOLUTION - Removed the action listener as well as the item listener.
