SOFTWARE RELEASE NOTES

MCS-CONNECT
Version 17.07.00
10/15/2015

Updates from previous versions:

New Features:

1. Added a Lockout Reset option to the XML to allow the user to create a button in Graphics that performs a Lockout Reset.
2. Added auth level to buttons to allow user to designate certain buttons to be disabled without proper authorization. This will also let us disable the button of the current page.
3. Added foreground color and auth text to graphics Authorization button to appear the same as the Button Bar Auth button.
4. Added graphs to Offline Graphic XML Loader class.
5. Added point editing buttons to offline graphics loader, they display a popup describing the functionality.
6. Added lockout reset button to offline graphics.
7. Added 4 new Sensor types to sensor types arrays (Ruking)
8. Added new Alarms array to V14 & V17 for alarm types #419-482 (Ruking)
9. Added a local save only option to the alarm alerts.

Bug Fixes:

1. Made the background and foreground color of the Buttons in the Graphics Panel optional. The MCS standard will now be the default button style. This will allow all buttons to look the same.
2. Increased the refresh rate of the four part animation in the Graphic XML Loader.
3. Fixed a bug that was flipping the value of ROs for all XML Graphic widgets instead of just for the new Graph widgets.
