SOFTWARE RELEASE NOTES

MCS-CONNECT
Version 9.03O
09/10/2012

Updates from previous versions:

Bug Fixes:

1. **SI Filter Popup was being displayed off the viewable screen due to a bug that was determining the location of the SI Grid incorrectly. This caused any popup created AFTER the SI Filter popup to not display due to the constraint of only 1 popup at a time being allowed. Resolution - I changed the location of the SI Filter popup to be based on the center of the screen.**
