SOFTWARE RELEASE NOTES

MCS-CONNECT
Version 9.30J
05/13/2013

Updates from previous versions:
New Features:

1. **Copied all code to add the hide/show option to the RO, AO, and SI grid in MagnumV14Device.**

Bug Fixes:

1. **The Dehumid enable sensor in MicroMag code was being incorrectly displayed sometimes causing MCS-Connect to stop functioning. This was caused by an incorrect index into the controlling sensor. RESOLUTION - Found the offending bug and eradicated it.**
2. **Service Panel not functioning for V14 device types. The service panel had not been adjusted to work with V14 code. RESOLUTION - Added code to allow the service panel to detect the V14 cfg type and adjust itself accordingly.**
