

SOFTWARE RELEASE NOTES

MCS-MAGNUM

Version 8.05E

03/22/2011

Updates from previous versions:

Bug Fixes:

1. Corrected alarm/event message generated when Ice Mode has completed based on temperature. It was generating "UNUSED ALARM #58"; now it generates the message "TMP OFF-ICE MADE".
2. Corrected tonnage calculation from displaying negative value. If the Δ temperature across the chiller barrel or Δ enthalpy across the DX air coil is a negative value, then force it to zero.
