

SOFTWARE RELEASE NOTES

MCS-MICROMAG

Version 15.00B

07/03/2013

Updates from previous versions:

New Features:

1. Changed layout of the keypad menu. Removed BMS Options Submenu, moved into the service tools menu. Also changed the display of many text headings. Additionally ensured that all items kicked back to the appropriate spot while also displaying a proper confirmation of change.
2. Changed saving of data to memory. Ensured that only messages specifically for the configuration addresses will write to the config. This will reduce the chances of configurations being overwritten.
3. In Menu, changed "Change Made" to "Change Made ".
4. Added an "OFF NET STOP" state to indicate that the unit is off because of the network run stop.
