

SOFTWARE RELEASE NOTES

MCS-MICROMAG

Version 4.00A

11/19/2012

Updates from previous versions:

New Features:

1. Added precooling RO, AO, and SI names

Bug Fixes:

1. Updated state names for supervisory controls
2. When percent wanted is not applicable to capacity control states, removed the percent wanted from the keypad status screen. This necessitated a backend shift where cooling and precooling were no longer handled in the same state
