## Description & Specifications

Part #  
**MCS-WIRELESS MODEM-INT-B**

### Description

The **MCS-WIRELESS MODEM-INT-B** is a compact industrial 4G (LTE) router equipped with 2 Ethernet ports, WiFi and RutOS software for advanced networking solutions. It delivers high performance for mission-critical cellular communication in rigorous environments, where wide operating temperature is required. Equipped with external SIM holder, digital input/output and signal strength status LEDs, it ensures easy network management. External SMA antenna connectors make it possible to attach desired antennas and easily find the best signal location.

The Wi-Fi is functional in both: Access point and Station mode at the same time.

- Supports 4G LTE data
- Creates a WiFi and Ethernet network to share the cellular connection with other devices (802.11 b/g/n)
- 4G (LTE-FDD): Band 4 and Band 13
- 1 x Digital input, 0 - 6 V detected as logic low, 8 - 30 V detected as logic high
- 1 Digital open collector output, max output 30 V, 300 mA
